

随车吊系列液压缸

Truck suspension series hydraulic cylinder

随车吊液压缸是为适应装配于载货汽车上在的一种专门研制开发的产品。针对随车吊液压缸的高压、偏心偏载等环境，采用特殊的支撑和密封组合、高强度合金材料以及合理热处理工艺，全面保证随车吊液压缸的性能和可靠性。按吊机类型分为直臂式和折臂式，按吨位分为 5T~20T，已批量为国际知名公司配套，完全可替代进口。

The truck crane hydraulic cylinder is a product which is specially designed and developed for the adaptation of the truck mounted on the truck. The performance and reliability of the hydraulic cylinder with a special support and sealing combination, high strength alloy material and reasonable heat treatment process are used to ensure the performance and reliability of the hydraulic cylinder. According to crane type into straight arm type and folding arm type, according to the tonnage is divided into 5T~20T, has volume for the international well-known companies, can completely replace imported.

机型 Model	名称 Name	缸径 Bore	杆径 rod	行程 Stroke	安装距 Mounting distance	单台用量 Single station
6.3T	变幅油缸 Lift cylinder	150	100	680	1080	1
	伸缩油缸 Telescopic cylinder	90	70	2600	180/3240	1
	前水平油缸 Front horizontal cylinder	50	28	1460	1730	2
	前垂直油缸 Front vertical cylinder	75	55	580	835	2
8T	变幅油缸 Lift cylinder	160	110	755	1135	1
	伸缩油缸 Telescopic cylinder	100	75	3000	185/3750	1
	前水平油缸 Front horizontal cylinder	50	28	1660	1910	2
	后水平油缸 Rear horizontal cylinder	50	28	1270	1550	2
	前垂直油缸 Front vertical cylinder	80	63	640	875	2
	后垂直油缸 Rear vertical cylinder	75	55	460	675	2
