

STICKER CHAIN

TYC thermoforming sticker chains are designed and manufactured to the highest standard, in order to meet customer specific requirements for applications. Available chain sizes include ANSI 40, ANSI 50, ISO 08B and ISO 10B in single or multiple strands. A selection of sticker profiles could satisfy your various requirements for different packing applications. TYC's engineering group is also capable of helping customers to develop their own special design.

Attachments

Extended pins, saddled attachments at different spacing, and outboard rollers are all available at your desired design.

MATCHED IN PAIRS

Precision assembly & length control

Precise length control and chain alignment ensures accurate film positioning. Matched chain pairs ensure the steadiness and consistency of operating performance.

Sharpness of sticker

Specially designed profile and hardened sticker offers the best solution for handling your thermoforming material. The angles of sticker tips are optimized to easily penetrate most plastic films. Extra tip sharpening is available for extra thick material.

Hardness of material

Tightly controlled and optimized heat treatment process improves wear resistance and brings strength and toughness to the components.

Solid bushings

TYC supply carbon steel version of sticker chains with solid bushings. The use of solid bushings ensures longer chain life for TYC thermoforming sticker chains.
