

# MYSTERIOUS

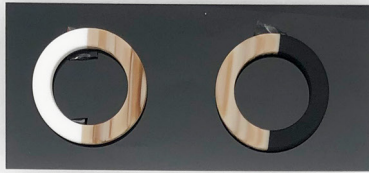

A range of colours that used to be difficult to propose for summer. We now see that in all leading developments these colours create newness for the organic patterns and look very delightful with splashes of metallic to take dullness away.

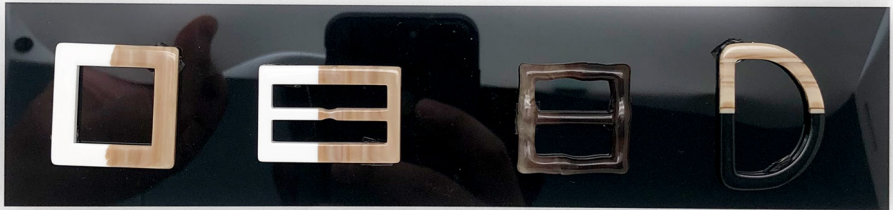

# BALANCE

The must-have inclusive skin tones selected to also extend to the crucial development of longwear. These colours are very exciting when mixed with flower tones in the new muted, romantic mood and updating the pastels from next group. New for athleisure colour mixes.
