

## **Product Information**

## VESTAKEEP® 2000 GF30

## Glass fiber-reinforced (30%) polyether ether ketone

VESTAKEEP 2000 GF30 is a medium-viscosity, glass fiber-reinforced (30%) polyether ether ketone for injection molding.

The semi-crystalline polymer features superior mechanical, thermal, and chemical resistance. Parts made from VESTAKEEP 2000 GF30 are self-extinguishing.

VESTAKEEP 2000 GF30 can be processed by common injection-molding machines for thermoplastics.

We recommend a melt temperature between 380°C and 400°C during the injection molding process. The mold temperature should be within a range of 160°C to 200°C, preferably 180°C.

VESTAKEEP 2000 GF30 is supplied as cylindrical pellets in 25 kg boxes with moisture-proof polyethylene liners.

For information about processing of VESTAKEEP 2000 GF30, please follow the general recommendations in our brochure "VESTAKEEP Polyether Ether Ketone."
