Fuji-Xerox Digital Sheet / B5110F

◆ Brief Introduction:

BOYUAN Xerox digital sheet B5110F is developed specially for the whole series of Xerox digital printing machines. With excellent printed image, ink adhesion and heat resistance, it is widely used in ID cards and documents production.

◆ Using Method:

Printed directly by the Xerox digital printing machine.

◆ Characteristics:

- Good printability.
- Excellent adhesion to toner.

◆ Technical Parameters:

Item	Parameters
Surface	Clean and flatness
Dimensional Tolerance (mm)	±1
Angle Cut Tolerance (mm)	±1
Diagonal Difference (mm)	≤1.2
Thickness Tolerance (mm)	±10%

Laminating Condition:

Laminating Unit	Temp(°C)	Pressure(MPa)	Time (min)
Heat Laminating	110~130	≥8	≥20
Cool Laminating	≤40	≥8	≥20

◆ Packing:

Outer: Carton Inner: PE bag

◆ Storage:

Keep package sealed and moisture-proof, room temperature between 5-30°C.

Keep horizontally, avoid oppress heavily and direct sun light.

Stacking height should not exceed one meter.

Shelf life: One year.

! The information is based on our practical production and result of testing. We suggest testing should be necessary before a batch use. We announce that the specification can not be used as the guarantee of the products.
