

15SQ045 THRU 15SQ060

Photovoltaic Solar Cell Protection Schottky Diode	Reverse Voltage 45-60 Volts Forward Current - 15.0 Amperes																																																												
Features	R- 6																																																												
<ul style="list-style-type: none"> ● Low power loss, high efficiency ● High current capability, low V_F ● High surge capacity 	 RoHS COMPLIANT																																																												
Mechanical Data <ul style="list-style-type: none"> ● Case: JEDEC R-6 molded plastic ● Polarity: Color band denotes cathode ● Mounting position: Any 																																																													
Applications <ul style="list-style-type: none"> ● For use in solar cell junction box as a bypass diode 																																																													
Maximum Ratings and Electrical Characteristics																																																													
Rating at 25°C ambient temperature unless otherwise specified.																																																													
Single phase, half wave, 60Hz, resistive or inductive load.																																																													
For capacitive load, derate current by 20%.
